

QUANTUM FEELINGS

Leslie Potter 2014

**Sun rising slowly from the ground
Nothing is heard for miles around
In all those things you have not tried
You'll find the boundries of your mind
And come to know - there's just nothing**

**There is just nothing everywhere
From near and far and here and there
Someday you'll just not want to hide
You'll find those things you could not find
And come to know - there's just nothing**

**Somehow we should know when to go
Out past that old black nada hole
And then we'd get to order time
With extra chunks of steak and wine
And come to know - there's just nothing**

**Just think of nothing when you go
Just think of nothing when you go
Just think of nothing when you go
Out past that old black nada hole
Through sun and wind and rain and snow
And come to know - there's just nothing
Nothing nothing**
